Lais Rodrigues

Full-Stack Developer · React + TypeScript · Ruby on Rails

Gràcia, Barcelona · fullstacklaisrodrigues@gmail.com · linkedin.com/in/devlaisrodrigues
developerlais.vercel.app · github.com/laisrod · Authorized to work in Spain · Available immediately

Professional Summary

Full-Stack Developer with 3+ years building web applications with **React 19 + TypeScript** on the frontend and **Ruby on Rails 7+** on the backend, on top of PostgreSQL, Redis/Sidekiq and Docker. At Barcelona Activa I built the frontend of **ITA Wiki**, an educational platform, within a cross-functional Scrum team. As a freelancer (Upwork / Infinite Quasar) I deliver end-to-end projects: REST APIs, JWT authentication, real-time features with Action Cable, testing, CI/CD and deployment.

My main project, **PaLeva**, is a full-stack restaurant management system with a versioned Rails API, a React frontend with dashboards and real-time order tracking, covered by 159 RSpec tests. Before tech, I spent 10 years in premium fashion sales and 3 years as a teacher: I understand end users, communicate clearly with product and design, and can explain technical topics well. Looking for a Full-Stack role (React + Rails) at a product company in Barcelona.

Tech Stack

Frontend: React 19, TypeScript 5.7, Next.js, Vite, React Router DOM 7, React Hook Form + Zod, Context API, Redux Toolkit, Tailwind CSS 4, styled-components, Recharts, Vue.js

Backend: Ruby 3.3, Ruby on Rails 7+, versioned REST APIs, Active Record, service objects, serializers, Devise + JWT, OAuth, Action Cable (WebSockets), Sidekiq, Hotwire (Turbo + Stimulus), webhooks

Databases: PostgreSQL, Redis, MySQL, MongoDB

Testing & quality: RSpec, Capybara/Selenium, Vitest + Testing Library, Jest, TDD, Brakeman, RuboCop, ESLint/Prettier

DevOps & cloud: Docker, docker-compose, Kubernetes, AWS (EC2, S3), GitHub Actions, CI/CD, Vercel, Linux

Other backends: Node.js + TypeScript, NestJS, Laravel 11 (Sanctum, Socialite, OpenAPI/Swagger, PHPUnit)

Ways of working: Scrum, Git/GitHub, pull requests and code review, Figma, technical documentation

Featured Project — PaLeva

Full-stack restaurant management system with owner and customer dashboards

Individual project (IT Academy capstone) · github.com/laisrod/PaLeva · pa-leva.vercel.app

- **Backend:** Ruby 3.3 + Rails 7.2, versioned REST API (*/api/v1*) with service objects, serializers and Active Record; PostgreSQL, Puma, Sidekiq + Redis for background jobs.
- **Authentication:** Devise + JWT (HS256), Google OAuth implemented manually (no OmniAuth) and ownership checks on write endpoints.
- **Real time:** order state machine over Action Cable (created > confirmed > in preparation > ready > delivered/cancelled), consumed live by the frontend.
- **Frontend:** React 19 + TypeScript 5.7, Vite 7, React Router DOM 7 (customer/owner areas), Tailwind CSS 4, custom API client and *useAuth* hook, dashboards with Recharts.
- **Quality:** 159 RSpec + Capybara/Selenium tests on the backend, Vitest + Testing Library on the frontend, Brakeman static security analysis, RuboCop and ESLint.

- **Infrastructure:** Docker + docker-compose with separate backend and frontend containers, CI with GitHub Actions and deployment on Vercel.

Professional Experience

Freelance Full-Stack Developer — Upwork · Infinite Quasar

Jun 2023 – Present · Remote

- Built backends with **Ruby on Rails 7+**, PostgreSQL, Devise/JWT and Action Cable: scalable REST APIs supporting 1,000+ concurrent users; implemented validations that reduced data errors by 35%.
- Frontends with **React 19 + TypeScript**, Redux Toolkit, Vite and Tailwind CSS, mobile-first and performance-optimized (infinite scroll, lazy loading); also Next.js and Vue.js depending on the client project.
- Production services with Node.js + TypeScript, including a NestJS contact API for my portfolio.
- CI/CD pipelines with Docker, AWS (EC2/S3), GitHub Actions and Vercel that cut deployment time by 50%.
- Maintainable code through TDD: RSpec on the backend, Jest and Vitest on the frontend.
- Direct client relationship: requirements gathering, estimates, incremental delivery and post-launch support.

Frontend Developer — Barcelona Activa (IT Academy) · ITA Wiki

Jun 2025 – Jun 2026 · Barcelona

- Built the frontend of **ITA Wiki**, a platform of programming learning resources for IT Academy students and professionals, with **React 19 + TypeScript** and Tailwind CSS.
- Features: resource management with filters, categories and tags; GitHub login and role-based access control; social features (likes and bookmarks).
- Clean React architecture with Context API for global state and reusable components; tests with Vitest.
- Full integration with the backend REST API (Laravel 11), with backend contributions: Sanctum, Socialite, spatie/laravel-permission, OpenAPI/Swagger documentation and PHPUnit.
- Daily work in a cross-functional Scrum team (development, Figma design, product), with Docker, Git/GitHub and code review.

Sales Associate — Animale, Ellus, Richards, Schutz, Osklen

Dec 2009 – Jan 2020 · Fortaleza, Brazil

- Consistently exceeded annual sales targets by 20% across premium fashion brands.
- Proactive post-sale follow-up and customer loyalty, re-contacting past clients to maintain the relationship.
- Inventory management and customer issue resolution, reducing complaints by 25%.
- Additional experience: 1 year in phone-based win-back of customers who had cancelled their internet service.

Education

University Microcredential in Frontend Development — UPC BarcelonaTech / IT Academy Barcelona Activa

2025 – 2026 · 8 ECTS, Pass · Credential ID Z3295412T

Associate Degree in Systems Analysis and Development — Descomplica Faculdade Digital

2024 – 2026

Ruby on Rails Bootcamp — Campus Code
Sep 2024 – Jan 2025

Bachelor's Degree in Portuguese Language and Literature (Teaching) — UECE, Brazil
2020 – 2023

Web Development — freeCodeCamp
2022 – 2023

Additional courses — Udemy (Ruby on Rails, JavaScript, Vue.js, databases) · AWS Cloud Computing for Beginners · JavaScript from Scratch · Ruby and Object Orientation

Languages

- **Spanish:** native / bilingual
- **Portuguese:** native
- **English:** B2 written (official certificate), advanced technical reading; spoken English improving through daily intensive classes.
